FLOOR DEBATE

March 27, 2002 LB 925, 1105

brought to us in order to rewrite a little bit of the provisions providing for the storage of motor vehicle and trailer information for sales at auto auction dealers. It allows for the electronic storage of that information, and it expands the recordkeeping requirement for those auctions from two years, from the date of sale, to five years. It does...it does change some of the requirements that are presently in statute, with regard to that information, and those are set forth in the committee statement. But, the committee heard the bill, there was no opposition, and unanimously advanced the bill to General File. It was LB 925, and to my knowledge it is to conform our auto auction recordkeeping statutes to what has become the standard in the industry and in other states, with respect to auto auction records. So, with that, I'd ask you support. Answer any questions if there are any, Mr. President.
